

Bio-Systems® International has some big news to share and we wanted you to be the first to know!

Since the acquisition of Bio-Systems International in 2010 by Betco® Corporation, Bio-Systems International has continued to operate independently in order to provide you with uninterrupted service, support and product expertise. Now, we are excited to announce the next phase in our long-term strategy.

Introducing EnviroZyme™!

The future company will be named **EnviroZyme™**. The name change will take place in the first quarter of 2018, and over the next several years significant investments will be made in the business to bring you the most **technologically advanced** bio-augmentation offering available.

EnviroZyme will move into a **brand new state-of-the-art fermentation facility** right on the Betco campus in the Fall of 2018. And this is just the beginning of what we expect will be a new era in customer-centered fermentation solutions.

We have big plans for this transition.

Best-In-Class
Production Facility
